(54) Title: MULTIPLE USE ADJUSTABLE SECURITY TRAILER FOR TRANSPORTATION, STORAGE AND HOUSING

(57) Abstract: The present invention provides a multiple use adjustable trailer for use in transportation, storage and housing, comprising: a substantially Y-shaped tongue (18) which pivots on a frame (2) into a perpendicular position where the lower portions of the side arms of the tongue (18) function as support legs for the frame (2), enabling the frame (2) to store and display materials or house equipment in the trailer bed. The tongue (18) is further secured vertically by hitch pins (8) in brackets (28) on the frame (2) that can be locked in place as a deterrent to theft. Two flip-down legs (30) pivotably mounted on the side of the frame (2) are used as temporary support legs before the lower portions of the side arms of the tongue (18) are fully engaged. The flip-down legs (30) are engaged when a hitch pin (8) is released from a hitch means on each side of the frame (2), enabling each flip-down leg (30) to freely pivot downward to contact the ground. The trailer further consists of a tongue coupler hitch (20), a trailer bed and means support wheels (36) and may also contains side rails for the frame (2) and an equipment cover (32).
